ABDULRAHMAN HISHAM

Aerospace Engineer

abdulrahmanhishamk@gmail.com | +20 150 334 7799 | New Cairo, Cairo, Egypt

LinkedIn GitHub Portfolio

PROFILE SUMMARY

Abdulrahman is an Aerospace Mission Concept Engineer with a strong focus on advanced space systems, sustainability, and strategic policy integration using AI-based solutions. He has experience designing space-debris-removal, IoT, and unique Space-based Advertising missions. He is currently pioneering next-generation satellite concepts by integrating AI into the Space Mission Analysis and Design (**SMAD**) process.

EDUCATION

Beni Suef University *2020 - 2025*

- B.Sc. in Navigation Science and Space Technology
  - **Focus Areas**: Space Engineering, Satellite Technology, Guidance, Navigation and Control (GNC) systems, design and implementation of automated spacecraft, space communication systems, and automation.
  - **Capstone** on "Enhancing Space Mission Planning Using Retrieval-Augmented Generation Models"
  - **Research**: Projects in the analysis & design of space missions, robotics, Machine Learning, and Deep Learning.

WORK EXPERIENCE

Space Mission Concept Engineer | AQMAAR.SPACE *JUL 2025 - JAN 2026*

- Analyzed the first space advertising mission (SIRB) and built the mobile application and its software architecture.
- Analyzed a satellite IoT mission, simulated the mission on MATLAB, and designed the ground station.
- Analyzed space debris and disposal methods, providing regulatory solutions for the disposal of defunct satellites

Freelancer **Feb 2024 - Jan 2026**

Web Developer, RakazElTamdidat Jan 2026

- Designed and developed the official corporate website, establishing a professional digital presence.

AI Coding Trainer, Invisible Technologies Inc Jun - October 2025

- Assessing AI-generated STEM responses (Mathematics, Statistics, Probability) for scientific accuracy.

SEO Specialist, TELUS International March - July 2024

- Improved search result relevance through Page Quality (PQ) evaluations and user satisfaction by Needs Met criteria

AI Coding Evaluator, Scale labs Sep-Oct 2024

- Reviewing AI-generated solutions to ensure accuracy and adherence to best practices.

COURSES & CERTIFICATIONS

- **Microsoft**: AI Fundamentals in Azure (AI-900) (June 2025).
- **Digital Egypt Pioneers**: Diploma in AI and Data Science (April 2024 – Nov 2024).
- **AWS**: Introduction to Generative AI (April – July 2025) | Machine Learning Fundamentals (June 2025).
- **Internships**: Egyptian Space Agency | National Authority for Remote Sensing and Space Sciences (NARSS) | Cairo International Airport | National Research Institute of Astronomy and Geophysics (NRIAG) | Egyptian Petrochemicals Holding Company (ECHEM) | National Institute of Laser Sciences (NILS).

SKILLS

- **Technical** Skills: Space Mission Analysis & Design, Satellite Technology, GNC, MATLAB, Simulation, Software Architecture, Python, Machine Learning, LLM Creation & Fine-tuning, Data Analysis, Cloud Services.
- **Soft** Skills: Effective Communication, Leadership, Decision Making, Time Management, and Task Management.
- **Languages:** Arabic, English, French, German
