AydnLabs Presents

AYDNFLOW

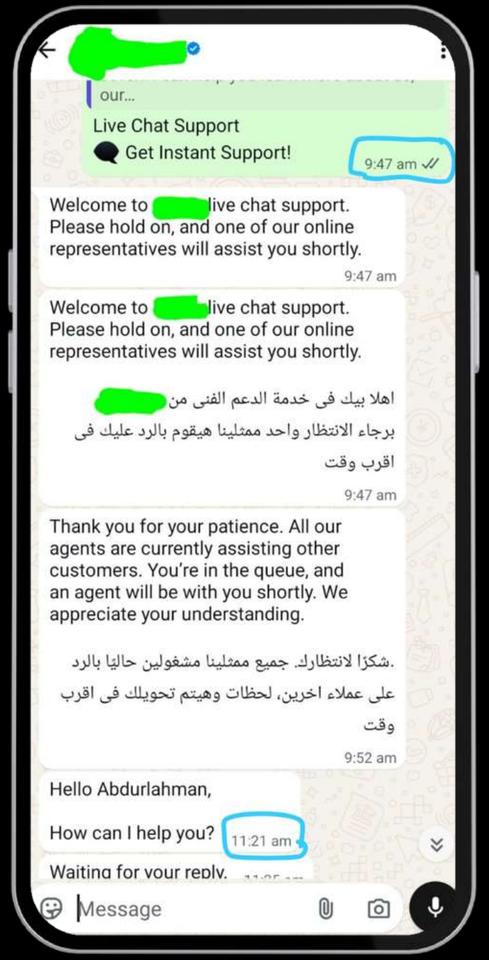

Empowering businesses in the MENA Region with autonomous, native AI agents for Sales & Support

The High Cost of Human Constraints

Marc Benioff
CEO of Salesforce

“Thousands… hundreds of thousands of leads have never been called back. In the agentic world, there’s no excuse for that. Every lead can be followed up on.”

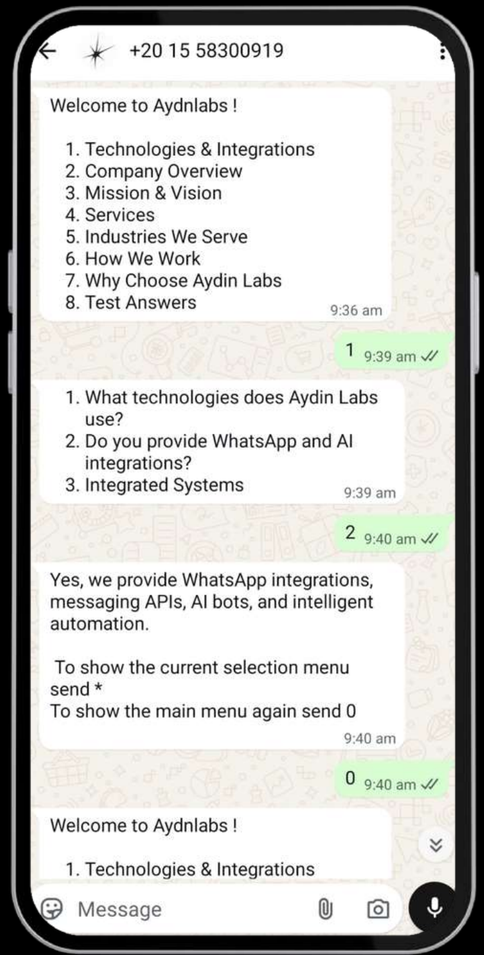

Meet **AYDNFLOW**

Multi-lingual AI Agent

A tireless, bilingual digital workforce that never sleeps — built to understand your customers the way your best agents would.

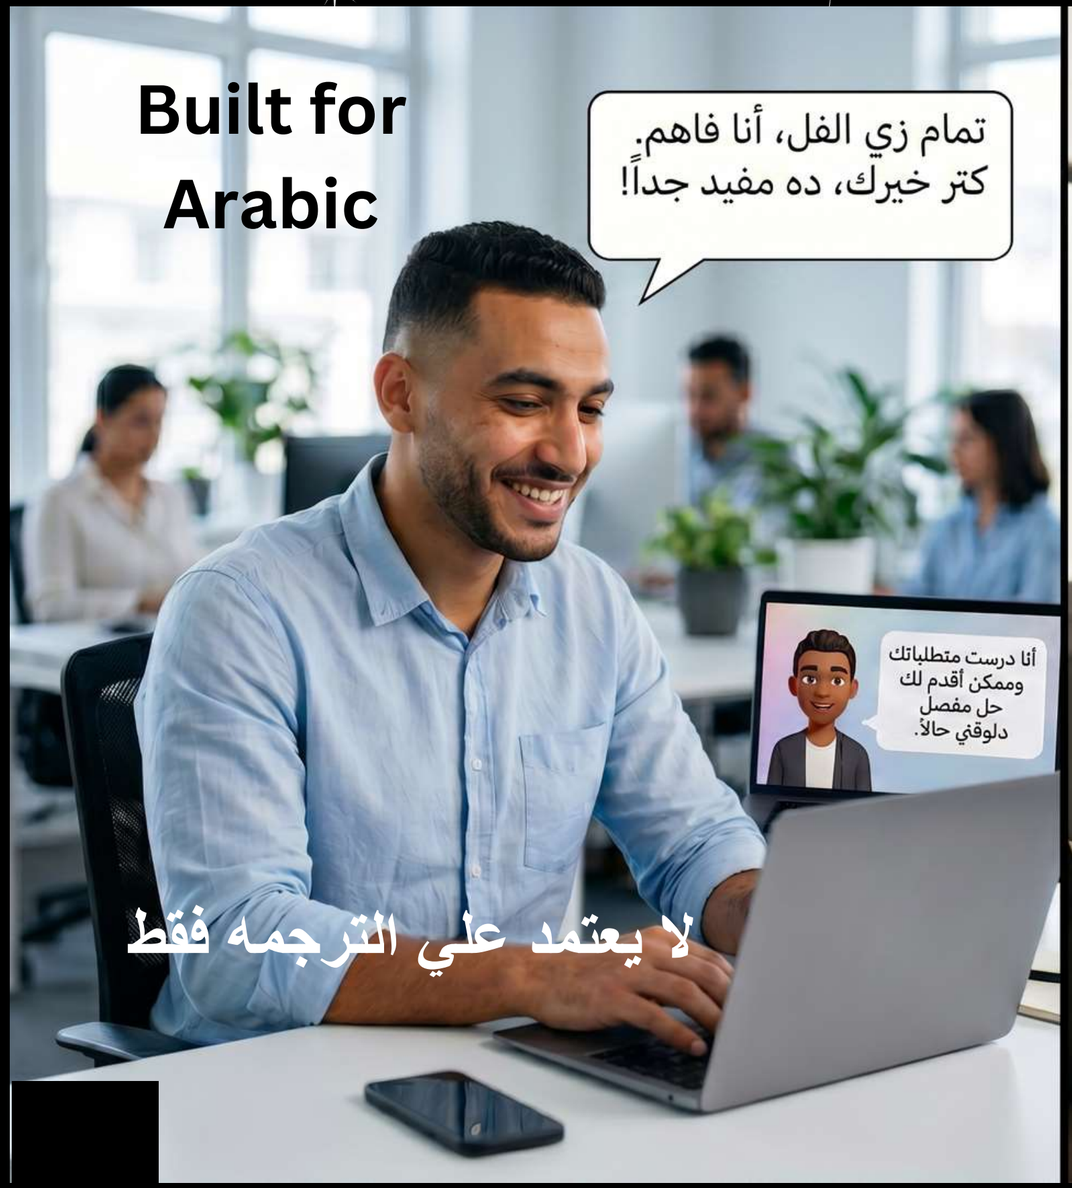

Instant Responses
Zero wait times.
Zero missed opportunities.

15+ Arabic Dialects
Native understanding not translation, true localization.

Most AI models are English-first. In Arabic, they collapse, mixing dialects and breaking customer trust.

WHY AYDNFLOW

Infinite Scale, Predictable Costs.

Generative AI Mode

- Fluid, human-like conversations for complex sales and support.

Deterministic Template Mode

- Rule-based, auditable workflows for regulated transactions.

Smart Subscription Quotas

- Your tier powers a set volume of Generative AI interactions.

Zero-Downtime Fallback

- Exceed your AI quota? The system instantly falls back to Template Mode.

The Business Impact

100% uptime for your customers. Zero hidden inference costs or runaway token bills for you.

AI Agent - 09:14 AM

I want to create amazing AI agent to my company just like you

09:15 AM

Creating an AI agent like the one at Aydnlabs involves several key steps, and we can certainly help you with that:

1. *Custom Development*: We design and develop AI bots tailored to your company's specific needs. This includes defining functionalities and integrating them with existing systems.
2. *AI & Integrations*: Our team is skilled in integrating AI technologies with platforms like WhatsApp and other messaging APIs, ensuring seamless communication abilities.
3. *Ongoing Support*: We offer technical support to maintain and optimize your AI systems over time, ensuring peak performance.
4. *Scalability Focus*: The solutions we build are scalable and future-proof, allowing your AI agent to grow with your business needs.

If you'd like to proceed, feel free to share your contact details or any specific requirements, and we can explore how best to assist you!

AI Agent - 09:15 AM

Yes, please

3,000 AI chat credits.
30 concurrent customers

$0.010 per client for each extra client to handle
$0.04 per chat credit
Extra human seat: $5/mo

$100 per month

The True Cost of Human-Centric Support

Scaling to 10,000 clients (3,300 tickets/mo) requires 15 full-time agents.

Human-Centric Customer Service

15 Full-Time Agents

- **$53,000 USD** / year
- **$12k Upfront** (CapEx)
- High churn, hiring hustle
- Delayed off-hour response times.

AYDNFLOW

3 Human Agents

3 QA managers

Enterprise solution

- Starts at **$8,000 USD** / year
- **%20** Upfront
- Zero hiring hustle. Instant 24/7 response.
- Humans only handle high-value escalations.

Save **$35,000** annually, eliminate 80% of hiring overhead, and achieve 100% uptime

(Not ready for an Enterprise deployment? Scale at your own pace with our standard **SaaS** tiers).

AYDNLABS

Building MENA region AI infrastructure

Goal

Our mission is to develop homegrown, MENA-focused technology solutions that give organizations more control, stronger localization, and no dependence on external systems.

Future

Become the leading company in this Arab technological breakthrough, helping the Arab world build its own intelligent software stack with full control, localization, and long-term independence.
